

Did you know Microsoft no longer supports Dynamics AX?

As of January 2023

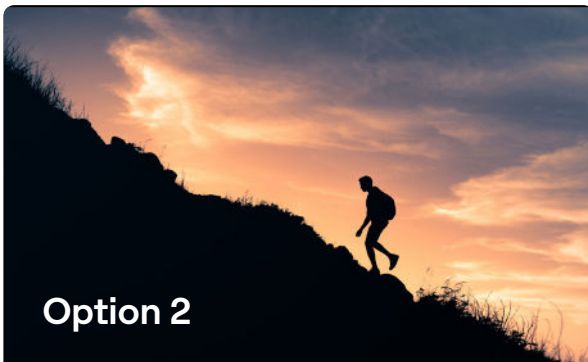

Modernize your ERP solution now

As of January 2023, Microsoft is no longer supporting any version of Microsoft Dynamics AX. This leaves businesses still running Dynamics AX with just two options:

Option 1

Transition to Microsoft Dynamics 365 now with HCLTech's help

Option 2

Accept the security and privacy risks associated with using unsupported on-premises software

Microsoft invests more than **\$1B a year** and employs more than **3,500 security experts** to protect your information.

This comes as a surprise to many of our clients, but your data is actually more secure in the Microsoft Cloud than in your data center's server room.

Obviously, #1 is your only real option at this point, and while moving to a new ERP system can seem daunting, HCLTech's Cloud Migration Tool - combined with our breadth of experience applying our Proven Process to cloud migration journeys - will get you transitioned efficiently and smoothly. Plus, moving to a cloud-based version of Dynamics 365 comes with a whole host of benefits you're currently missing out on.

Key benefits of migrating to Dynamics 365

- 1 Leverage Microsoft state-of-the-art best practices for security** of your sensitive data with a 99.9% uptime service-level agreement. This includes disaster recovery, redundancy and patches, all of which are included out of the box with Dynamics 365.
- 2 Make intelligent business decisions quicker** with integrated solutions for low-code app development, business intelligence, artificial intelligence, automated bots, analytics and processes.
- 3 Simplify your IT landscape** by eliminating the need to maintain and update servers.
- 4 Enjoy the cost savings** that come with a cloud environment, as well as the ability to redesign and modernize business process to **focus on innovations and faster ROI.**
- 5 Leverage the flexibility of the cloud** to **work from anywhere on any device with access to all your Microsoft solutions.** Grow, acquire and scale on the fly.
- 6 Always access the newest features and performance improvements of Dynamics 365** because Microsoft continuously updates the cloud-based version. It is also compatible with and accessible from familiar Microsoft solutions like Power Platform and Office.

Why HCLTech?

We bring together the best of technology and our people to supercharge progress.

For our Clients

We help deliver business outcomes for our clients, at speed and at scale - vested to solve day-to-day or complex challenges with both pragmatism and resilience.

For our People

We help current (and prospective) employees 'find their spark' and supercharge their career potential.

For our Communities

We believe that impact comes from within and it drives our long-standing commitment to the communities where we work and live.

For our Planet

We deliver long-lasting impact through our actions as a company and through our pacts with stakeholders for a more sustainable future.

Start your migration process today

Step 1

Start by answering a few quick questions [here](#)
