ENHANCE, EMPOWER, AND IMPROVE HEALTHCARE OUTCOMES

with Microsoft Cloud for Healthcare

With Microsoft's trusted and fully integrated cloud capabilities as its foundation, the Microsoft Cloud for Healthcare is designed to empower hospitals and clinics to improve healthcare outcomes. Developed by healthcare experts, the Microsoft Cloud for Healthcare delivers the industry's most powerful technology solution to:

Enhance Patient Engagement

Empower Health Team Collaborations

Improve Clinical and Operational Data Insights

Protect Health Information

Why Microsoft Cloud for Healthcare?

Connectivity is of the utmost importance for healthcare payors and providers at every point on the healthcare journey. The Microsoft Cloud for Healthcare is helping to transform that journey.

Self-service portals
that enhance patient engagement end improve the efficiency of care teams

Connected analytics
that leverage protected health data using FHIR, IoT, EHR, and other applications

Collaborative workflows
that empower healthcare staff to schedule, manage, and conduct virtual visits seamlessly

The Microsoft Cloud for Healthcare delivers advanced technology tools to streamline operations. Just as importantly, it sits on a single platform that provides industry-specific terms and templates that limit customizations. The end result is saving you time and money.

HCL, PowerObjects' parent company, is proud to be one of only eight Global Systems Integrators (GSIs) selected by Microsoft as a launch partner. Our team of healthcare experts is excited to make the cloud a reality for health and life sciences organizations just like yours.

Why HCL-PowerObjects?

Our experts implement and customize Microsoft's trusted and integrated cloud capabilities to empower your care teams to deliver consistently excellent care. This is accomplished by coordinating patient care through collaboration, automation, and workflow efficiencies while simultaneously generating insights that improve patient outcomes through predictive assessments and proactive care.

MICROSOFT GLOBAL PARTNER OF THE YEAR

2020 WINNER

Proactive Customer Service Award

HCL-PowerObjects has the expertise to help you implement Microsoft Cloud for Healthcare, but we don't stop there!

Connect and Stay Connected

The technology may already be there, but we bring the expertise – through our interoperability offering and extensive healthcare experience – to bridge the gap between your EMR data and FHIR servers.

We're on the Cloud – Now What?

Every cloud journey is different. HCL-PowerObjects helps fine-tune a user adoption readiness program and sustainment roadmap to set you up for success – now and for years down the road.

Ready to get started? So are we!
