HCLTech | Supercharging Progress™

Delivering Transformative Technology Solutions in the **Health and Life Sciences Industry**
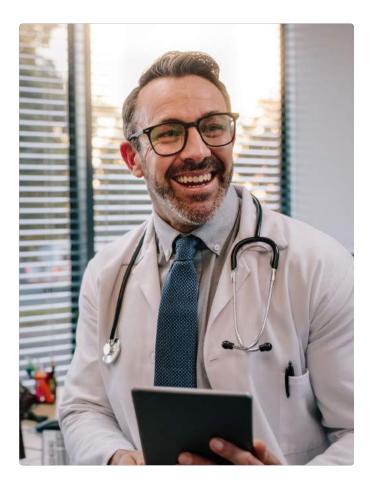

Power Platform

Why **Power Platform**
for Health and Life Sciences?

The COVID-19 pandemic has caused a major strain on the Health and Life Sciences industry with increased demand for healthcare services and a surplus of patients needing critical care. This crisis is pushing health organizations to the limit and confirming the need for a connected technology platform to scale vital services for patients.

Power Platform tools are helping healthcare organizations dramatically reduce paperwork and administrative duties alike so they can instead focus on providing care. Self-service tools and portals are improving the patient experience as well as helping to identify patient needs early on.

Free up physicians to focus on patients

By reducing the burden of documentation and paper-based processes, doctors can spend more time where it's needed - with their patients!

Provide the best patient care and experience

Instead of making patients tell and retell their medical history, Power Apps solutions help unify, automate, improve and digitize workflows that enhance the patient experience.

Automate time-consuming processes

Advanced technology like Artificial Intelligence (AI) is making processes more efficient and accurate. And because Power Apps can connect to more than hundreds of data sources, healthcare organizations can build apps across all hospital operations.

Get Started with Power Platform

Why low-code solutions?

With Power Apps, the healthcare industry is unlocking true innovation. The visual approach to building apps empowers your teams to quickly turn their bright ideas into brilliant apps on a **single end-to-end low-code platform**.

In addition, these low-code solutions enable you to **automate manual processes** and data collection to solve your most pressing problems. With Power Apps, your teams will be designing **highly customized task**- and **role-based applications** in no time.

And finally, you can be confident your data is accurate and up to date by leveraging the Common Data Service (CDS) to integrate data from hundreds of sources with enterprise-scale **security and governance** – one platform for all your data for a **single source of truth!**

188%
ROI over three years

132,000
worker hours saved from streamlined and automated activities (Year 3)

4.3%
revenue uplift linked to increased, faster development efforts

Organizational governance and adoption

Part of deploying a successful Power Platform initiative is having a roadmap for effective organizational adoption and governance. HCLTech is focused on ensuring success by helping organizations build an internal Center of Excellence to govern structure and processes, as well as manage security, all while encouraging adoption and innovation.

Choosing the right **technology partner**

HCLTech - the 2022 MSUS Power Apps Partner of the Year – delivers end-to-end business transformation and strategic application design-and-builds throughout the healthcare industry. Our Power Platform experts work with clients to solve their unique business challenges and provide training and app-in-a-day events for our clients.
