

**Boot Camp 200**  
**Dataverse Administration & Security**

# Course Level: 200

Expand your capacity to administer Dynamics 365 and Power Apps model-driven apps. This continuing course in the Dataverse Boot Camp Series introduces the administrative experience with hands-on practice in the Power Platform Admin Center. This course offers a comprehensive introduction to the components of the Dataverse security model while also covering how to manage user and team records and work with queues. Our course concludes with data management considerations around configuring search functionality, and use of the administrative tools of duplicate detection, import wizard, and auditing.

# At A Glance:

## Boot Camp 200 – Dataverse Administration & Security

### Why Enroll?

Expand your capacity to administer Dynamics 365 and Power Apps model-driven apps. Confidently navigate the relevant administrative interfaces
